## **Time Running Out for Windows 10 Free Upgrade**

Microsoft's Windows 10 operating system was released to the public on July 29, 2015 and users were encouraged to upgrade for free. At the time Windows 10 was heralded as a replacement for Windows 8 or 8.1, which were not well accepted by users and as a replacement for Windows 7 which was well-accepted by computer users.

Usually the release of a new operating system has problems and it is wise to wait until the "bugs are worked out." Microsoft has improved Windows 10 since last July and we at Park Place Computers feel that this version is now ready to be installed on your PC. We have installed Windows 10 on our own PCs and have minimal problems.

Microsoft's official position is that an upgrade to Windows 10 is **free until July 29, 2016**, the one-year anniversary of its release.

If you wish to upgrade to Windows 10, we strongly suggest:

- Allow at least 3 – 4 hours for the download and install process. You do not have to sit by your computer while this occurs but you might be stay at home until Windows 10 is installed.
- Once the process starts, do not turn off your PC. You may have to manually reboot the PC after a prompt.
- Once Windows 10 is installed, the interface will look like this. The power switch may be found by clicking the Start button in the lower left corner and then click Power.

- If you do not wish to install Windows 10 yourself, contact Park Place Computers and we will schedule a time to install Windows 10 for you!
